DOCUMENT-IDENTIFIER: US 4831526 A
TITLE: Computerized insurance premium quote request and policy issuance system

Brief Summary Text (24):
The data base is updated in the event that certain additional reports, appraisals
or inquiries are needed before the issuance or finalization of the actual insurance
contract. Furthermore, the data base is used to send renewals to the client or to
induce him into purchasing other insurance. The client data base is also used for
"quality control" or "management reports" by which management can ascertain the
specifics of the insurance operation, such as the types of risks that are insured,
the locations of those risks, the productivity of various agents, and other
demographic data regarding clients.
